Notes to my Portfolio Reviewers

Document Overview

This is an example of a training proposal presenting training needs. I communicate training needs with this method if proposed training solution is short-term project.

What are short term projects?

- Refresher course
- Microlearning
- Training workshops (one session)

***For long-term training projects, I use needs analysis presentations. An example of needs analysis is also included in this portfolio.

Redacted Text

Any proprietary information related to a previous employer is redacted with black bands and will appear like this: [redacted].

Refresher Training Proposal: Rush Deliveries

Customer Service, Supply Chain

Opportunity

Upon low stock, our large-scale retailers often request one-off high-volume orders which do not adhere to two-week lead times or [redacted]

Result

- repeat rush deliveries
- unintended additional logistical costs affecting other production areas

Related Considerations

- disruption to planned production schedule
- securing freight at dynamic rates
- missed opportunities, stable customer volume increase

Business Cost

Dynamic sourcing: 200% - 300% freight rates
Operational costs: unplanned changeovers
Supply decrease: higher, steady profit margin

Sales Period: Q3, 1-4

Case Example		
Freight	Product	Total Profit
$1.5k	8 [redacted]	$1.5k

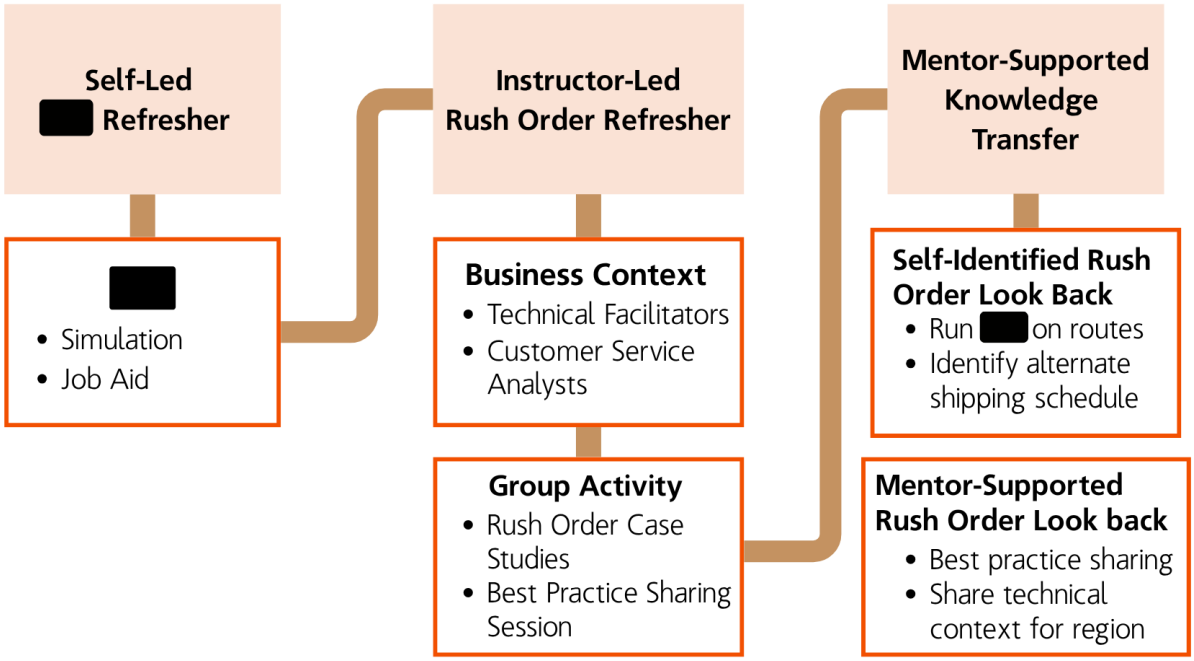
Opportunity Cost		
Freight	Product	Total Loss
$1.5k	3 [redacted] 7 [redacted]	$55k

**Profit loss is calculated by planned supply production shipping out to several retail locations over sales period

Training Plan

The following flowchart conveys training plan and within each step, individual components training components

Training plan flowchart



Objective Behavior Changes

1. Research cost-effective existing routes in lieu of rush ordering
2. Inquire with customer to better understand quarterly product needs
3. Collaborate with planning, logistics, and [redacted] for long-term shipping solutions

Project Team Expectations

Proposed project member contributions

Technical Training	Customer Service Project Members
Self-Led RIQ Refresher • **GYO:** ○ sits with CS project member, capture RIQ process ○ creates job-aid, RIQ simulation	• **CS Project Member:** ○ performs RIQ in [redacted] for screen grab ○ technical support if needed for job aid

Instructor-Led Rush Order

- **GYO:**
  - Creates business context materials, script takeaway talking points
  - Compiles case studies with project team member
- **Technical Facilitators**
  - Lead ILT session
- **CS Project Members:**
  - Attend each ILT section
  - Provide technical support for complex questions
  - Provide three previous instances for case studies

Mentor-Supported Knowledge Transfer

- **GYO:**
  - Provides team member prompt
- **CS Project Members:**
  - Sits with regional team members

Customer Service project members will vet content accuracy. Customer Service project sponsor will act as tie breaker in case of disagreement on presented content or related process represented.
