Training Checklist Walkthrough

Part I: Daily Recap of ILT content covered:
helps decrease double work.

This is an example of the on the job training a new hire undergoes with a mentor on Day 1 of functional onboarding. New hires sit down with their functional mentor daily to complete items on this checklist which align with content covered during the

Instructor-Led course portion of the program. This helps guide mentors to train on department specific information, skipping cursory information and cutting down on retraining the same topics.

Corresponding with the course level progression built into the Instructor-Led training course, the on- the-job training checklist increases in complexity as the new hire progresses through the onboarding program.

Software application and training beyond simulations

Introducing applications and uses earlier in the onboarding day allows for a more enriching experience with their department mentor. Additionally, mentors reviewing more complex tasks rather than new hires learning task steps through a simulation improves learning retention and transfer. Facetime with a team member sharing instances and anecdotes contextualizes tasks beyond clicks.
